Machine manufacturers are challenged to find innovative solutions with which productivity can also be increased. The companies are facing new challenges due to new demands on precision and flexibility, while pressure is growing at the same time to reduce running costs and initial investment, and as much as possible to remain competitive.

With PC-based control technology, Beckhoff offers an open and flexible automation solution for all areas of plastics processing, including extrusion systems and particularly in blow molding technology. Beckhoff provides total solutions to Plastic Converters resulting to efficient production and profitable operation. control technology, Beckhoff offers an open and flexible automation solution for all areas of plastics processing, including extrusion systems and particularly in blow molding technology.
